OHIO AGRICULTURAL EXPERIMENT STATION

Wooster, Ohio

Circular No. 6

Ohio Poultry Day

FRIDAY, JUNE 17, 1927

All roads in Ohio lead to the Agricultural Experiment Station at Wooster on Poultry Day. Each year the program is very different with the view of retaining the interest of the regular visitors.

POULTRY DAY SCHOOL

A considerable number of poultry keepers desire certain subjects considered more in detail than time and opportunity will permit on Poultry Day. To accomplish this purpose Poultry Day school the day before will be a special feature this year. More attention at this time can be given individual poultry keepers and a better opportunity offered for consideration of their questions. It is assumed that those who attend the school will desire to be present for both days.

HOTEL AND LODGING ACCOMMODATIONS

Visitors will find ample accommodations available at reasonable prices. For those who prefer rooms in private homes, a list of rooms will be provided.

LUNCHEON AT NOON

Each day visitors may bring their dinners or they can obtain a desirable lunch at a moderate price on the grounds.

ALL MEETINGS will be held at or near the Station's poultry plant.

SPEAKERS POULTRY DAY

Mr. E. V. Rice is one of Ohio's successful poultrymen. His experience and management of the farm poultry enterprise should be of interest and profit to others.

Professor J. G. Halpin, head of the Poultry Department, University of Wisconsin, is well known to Ohio poultry keepers. He is a leading authority on feeding and breeding. Poultry day visitors can expect some new facts on these subjects.

Mr. M. L. Howell is manager of the Poultry Producers' Cooperative Association, Wauseon, Ohio, which has been marketing the eggs from over 300,000 Ohio hens. Naturally there have been many problems and obstacles to encounter. Mr. Howell's message should be of value to every poultry keeper.

Mr. W. J. Buss, formerly in charge of poultry investigations at the Ohio Experiment Station, is now president of the Ohio Poultry Improvement Association and proprietor of the of the Wayne Poultry Farms. Perhaps no one has been in closer touch with the development of Ohio's poultry industry during the past 15 years than Mr. Buss. His experiences and observations should be of interest to all.

POULTRY DAY SCHOOL

JUNE 16, 1927

9:00 a. m.—Intestinal Parasites and Disease Problems.....	B. H. Edgington

DEMONSTRATIONS AND EXHIBITS

QUESTIONS

Have you the answer to these questions? If not better come to your Experiment Station, Wooster, Ohio, June 16 and 17, 1927

Are you practicing the most effective means of disease and parasite prevention and control?

Hatchability is largely determined by feeding and management—How?

When chickens are kept indoors they require a complete ration—Are you familiar with all the essentials and how to supply them?

When should pullets start to lay?

Why do pullets molt and what are the means of prevention?

What makes blood spots in fresh eggs—is there any prevention or control?

Do you understand the distinction between Accredited, Certified, and R. O. P. flocks?

Feeding cod-liver oil—How, when, what for?

What is the best solution of the winter green-feed problem?

How make progress with your breeding flocks?

What is the future of Ohio's poultry industry?

How supply the proper vitamins and minerals in the ration?

Can you cull the loafers from your flock?

Are you familiar with the points of a good breeder?

What is the procedure to secure better vitality and production?

That new poultry house—Which kind should it be? What provision for ventilation? What equipment is best?

Lice and mites are easily eradicated—How?

Have you a marketing problem? If so, what is its solution?

What purpose does cod-liver meal serve in the ration for chicks?

Are you familiar with all the steps required for pedigreeing chickens?

These and many other questions will be considered at the Ohio Experiment Station, June 16 and 17.
